

Download Managing Oral Anticoagulation Therapy Clinical And Operational Guidelines

Learning Outcome The learning outcome of this program is to enable the learner to incorporate best practices to the clinical practice of managing anticoagulation therapy utilizing current guidelines through interprofessional collaborative practice. Among the challenges in providing optimal anticoagulation with warfarin is an extensive list of drug-drug interactions that can result in fluctuating international normalized ratio (INR) values. 1-3 Variability in the INR and low time within the therapeutic range (ie, <65%) have been associated with increased risk of bleeding and thrombosis during warfarin therapy. 4-6 Warfarin interactions ... This fact sheet summarizes the status of the current acute shortage of small-volume parenteral solutions and provides an outline of potential actions for organizations to consider in managing the shortage. Revised 15 March 2013. Incidence Lung cancer which includes tumours of the bronchus, trachea and lung, is the second most common cancer diagnosed in British Columbia and also in Canada, for both men and women (National Cancer Institute of Canada, 2012). It accounts for about 12% and 13% of all cancer diagnoses in BC for males and females respectively.
