It relates to the total electrical load on the differential bus (D+ and D-, the DMX data signals). Each fixture connected in a daisy chain increases the load, and if it's too high, signaling can turn erratic and be difficult to troubleshoot. Engineering Are you studying engineering? Then you have come to the right place! Our free eBooks in this category will help you prepare for your exams thanks to sub-categories in electrical, mechanical, civil or environmental engineering. DTE Calvert City (DTECC) in Kentucky made the decision three years ago to upgrade its obsolete Process Suite HMI to APACS OS. For 15 years, the APACS distributed control system (DCS) had been a reliable and comfortable system used to maintain the operational functionality for a plant that generated power and utilities around the clock.
