Hi As Paydirt says get a timing belt kit and change everything, the other thing you might consider doing is the water pump, I do quite a few of these at work and the amount that come back with pumps leaking was quite high, we now recommend that the pump is done at the same time. There is an easy way to find out if your car is driven by a timing chain or timing belt motor. If, on the side (not top) of the engine, either left or right, there is a plastic cover, your car has timing belt. If there is no plastic on the side, you have a timing chain.
